DETAILED ACTION

1. Preliminary amendments filed 8 June 2001 (Paper No. 3 and 4) has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 34-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 34-36 recite or encompass the terms "ErbB4", "ErbB3" and "ErbB2" which is ambiguous because it is not clear what is the metes and bounds of each term. Only the name has been provided which can change over time and no structure of the receptor has been provided except by name. It is not clear what structural features separates each of the receptor from the other.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 34-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Goodearl et al. (US 5,530,109).

Goodearl teaches the method of binding of the GGF with the receptor (columns 9 and 13). SEQ ID NO:155 is the nucleic acid which compared with the reverse translated claimed SEQ ID NO:4 results in 74% sequence similarity. Since no structure has been provided for the terms "ErbB4", "ErbB3" and "ErbB2", the binding of Goodearl protein to GGF with different affinity is interpreted to have the same effect.

5. No claims are allowed.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Pak, whose telephone number is (703) 305-7038. The examiner can normally be reached on Monday through Friday from 9:30 AM to 6:00 PM.
